

CERTIFICATE OF ANALYSIS

Name: Borax decahydrate

Molecular Formula: $B_4Na_2O_7 \cdot 10H_2O$ **Molecular Weight:** 381.36

Physical State: powder **Appearance:** white

CAS NO.: 1303-96-4

Application: borax decahydrate is colorless translucent crystals or white crystal powder, odourless and salty. Borax is the basic raw material of boron compound, almost all the boron compound can be made by borax. It involves with an important and wide application in metallurgy, steel, machinery, military industry, cutting tools, papermaking, electronic valve, chemical, textile etc.
